YALE UNIVERSITY.

Entrance Examinations. According to the latest official advices, 1,121 young men are now undergoing examination for admission to the undergraduate departments of Yale unlversity. Of these 742 are for the college and 379 for the Sheffield Scientific chool. Of the examinations held away from New Haven no information has been received from several small places, which together in 1894 furnished 31 can didates for the college and 15 for the scientific school. Thus the most reasonable estimate of the total number of candidates under examination is 1.167-773 for the college and 394 for the scientific echool. This number falls short by just four of that of the candidates in 1894. The failing off is simply in the umber of final candidates for the selntific school, due to the marked adrance in the requirements for admission this year. This temporary reduc-tion in the size of the classes of Sheffield school has been expected. The increase (thirty) in the number of preliminary candidates for admission to the college

Is Essentially An Instrument For the Home.

The variety of music the Æolian performs—its repertaire is unlimited; together with its simplicity of operation—it can be played by anyons after a few days' practice, makes it interesting and entertaining for every member of the family.

The Bolian serves in a double capacity; it entertains and it instructs. It broadens and unitivates the tastes of its bearers by familiarizing them with the musical classics, and dent and modern. The Æclinn will play the simplest song, and play it well; but it is in playing a Beethoven symphony or a Back Fugue that the won-terful qualities of the instrument are reveal-
